

Barnegat Branch Trail

Beginning in 2008, Buchart-Horn worked as a sub consultant to Strauss and Associates, assisting Ocean County Department of Recreation and Parks with the design of Barnegat Branch Trail.

Design and planning assistance provided by BH included way finding signage design, trailhead facility design; landscape restoration plan preparation for the recovery of indigenous flora and fauna; traffic calming concepts, future phase planning, historically significant structure evaluation, and trail visitor center design.

The popular trail has generated wide support for continuing the trail, as originally planned, along the 15 miles from Barnegat to Toms River, connecting these historic villages and near-by residential districts to the area's many recreational and educational facilities.

Ocean County is witness to incredible popularity of the first trail segments with overwhelming public response.
